

TOWN OF SUNSET BEACH

TOWN COUNCIL AGENDA ITEMS

MEETING DATE: February 6, 2012

AGENDA ITEM NUMBER: 5.a.

SUBJECT: Road Resurfacing

SUMMARY OF INFORMATION:

We reviewed the current plan for resurfacing work this spring that will be advertised for bids soon with the intent of the work being completed by Memorial Day. The attached list is of those streets which are all on the mainland. The list was comprised by Larry Crim and Dustin Graham a few years ago. Those priorities still exist with just a little more wear and tear on them. The sewer work had to be accounted for, and there is no work planned this year on those streets where sewer was installed unless the streets have met the one year warranty that the County's contractor had to provide. The island streets won't meet that one year requirement until next year's work is bid out.

The estimated cost of the current year work is \$500,000. On page two of the list you can see the next year's planned work which does include some island streets with an estimated cost also of \$500,000. In year three there will also be some streets that need resurfacing work merely because they are a little rough as a result of the sewer installation and resulting patch work. These are island streets that are otherwise in good condition, but anticipating that people will not like the roughness, we have included them for Council consideration. Of course, given that their planned work is in year three, we can revisit them again.
